PRESS RELEASE

Energy Unit Launches New Website

Belmopan. January 7, 2021. 10:30 a.m.

The Ministry of Public Utilities & Logistics, under the leadership of Hon. Rodwell Ferguson, is pleased to announce the launch of its newly developed website through a collaboration with the Global Environment Fund (GEF) and the Energy for Sustainable Development Project (ESD).

The website was designed to be user-centric and has an intuitive interface that is responsive across all platforms and devices. The site offers access to essential information and features including updated news and press releases, program and project information, milestones, energy prices, and other activities and organizational events within the energy sector.

The Energy Unit operates with the mission to plan, promote, and effectively manage the production, delivery and use of energy through energy efficiency, renewable energy, and cleaner production interventions.

The new website provides critical information for all stakeholders including government, non-government organizations, media and academia. The Energy Unit invites all to explore the website at www.energy.gov.bz. Visitors to the site can expect regular updates with new content.
